Veterina

VETERINARY CLINIC MANAGEMENT

From hello to see you soon.

Big care. Little details.

Every visit has a story. Keep it together with Veterina. Patient records, daily workflow, and supplies, connected for the people behind the care.

FOLLOW MILO'S VISIT • AN ILLUSTRATIVE CARE JOURNEY

01
Milo arrives.
Find his record.
Manage his place in the queue.

→

02
The vet checks in.
Review his history. Record vitals, findings, and prescriptions.

→

03
Care carries on.
Log his vaccines and follow-ups.
Know what comes next.

What Veterina has to offer

ONE WORKSPACE. THE WHOLE CLINIC DAY.

Patient records
Pet profiles, owner details, photos, vitals, and clinical history in one place.

Appointments & queue
Organize bookings, see arrivals, and manage the day's patient queue.

Vaccinations & follow-ups
Record doses, track next-due dates, and log follow-up reminders and outcomes.

Inventory & suppliers
Monitor quantities, low stock, expiry dates, and stock movements. Keep supplier contacts close.

Prescriptions
Record medication instructions, print prescriptions, and link dispensing to inventory.

Travel certificates
Prepare and print clinic-issued certificates, with optional public viewing through a QR link.

Reports & exports
Review patient, vaccination, reminder, and inventory reports. Export records and print patient history.

Your clinic, your team
Personalize clinic details and branding. Approve staff access and manage owner and staff permissions.

RECORD & CLINIC KNOWLEDGE RECALL

"Wait, when was that?"
There's a record for that.

Look up patient history and published clinic documents with source-linked answers.

"When was the last rabies vaccine?"

Illustrative question. Recall is read-only and available when enabled by the clinic owner. Clinical decisions stay with the veterinarian.

Your next chapter starts here.

Explore the patient journey and the tools your team will use.
